From Basic Needs to Meaningful Work

“Internet had the ability to dismantle the divide. Internet failed miserably, the divide is bigger than ever.”
Kate Gilmore, Human Rights, UNO

Shouldn't access to information be a basic human right?

Framework conditions for Telekom operators

Unstable economies are drivers for conflicts

- Social Mobility (WEF 2019)
 - Ability to move up the pyramid
 - 1) Denmark
 - 2) Norway
 - 3-5 other Nordics
- “local money more important than religion”
- Decent work
 - Main driver for instability is **no work**

70% live in countries with increased divide
IMF panel 2019

Power Grid Cyber Attacks Keep the Pentagon Up at Night

A detailed look at why computers running the U.S. electrical infrastructure are so vulnerable to digital threats

By Michael McElfresh and The Conversation | June 8, 2015

The following essay is reprinted with permission from [The Conversation](#), an online publication covering the latest research.

It's very hard to overstate how important the US power grid is to American society and its economy. Every critical infrastructure, from communications to water, is built on it and every important business function from banking to milking cows is completely dependent on it.

Hacking illustration. Shutterstock

TEMPO.CO, Jakarta - The National Cyber and Encryption Agency's (BSSN) website www.pusmanas.bssn.go.id got hacked and hit by a defacement attack. Cybersecurity expert Pratama Persadha said the attack was posted on Wednesday, October 20, by Twitter account @son1x777.

- Verkada (Mar2021) sw clients; live feed of 150 k cameras
- WD Digital MyBook - remote factory reset
- QNAP NAS - hack of QNAP cloud -> private homes/SMEs had storage encrypted "ransomware"
- BotenaGO - Netgear & LinkedIn routers
-

Societal Security in the digital age

- Framework conditions
 - economics (open Internet, privacy)
 - app control
 - .no has to be "Norwegian laws"
- Protection of data & infrastructure
 - energy is critical infrastructure
 - empowerment of every single person

"Hvor .no står, må Norske regler gjelder"

Samfunnssikkerhet og elektronisk kommunikasjon: politikk, personvern, samfunnsnytte

- Utgangspunkt: "ingenting er sikkert"
 - IoT sikkerhet "consumer electronics"
- Trygghet gjennom
 - sårbarhetsanalyse
 - isolasjon av kritisk infrastruktur
 - involvering, trening
- Avveining
 - personvern vs samfunnsnytte

Summary

- Global challenges
 - Climate crisis
 - War in Ukraine, Ethiopia, Syria,...
 - Resources
 - Digital Divide
- "Nothing is secure"
 - we need framework conditions
 - Trust enhancement
 - involvement, training

The Business Model of access to the Internet does not fit for SSA

→ Western World

- fixed access (home, work) - 45 USD
- mobile access - 20-30 USD

→ Africa

- large distances
 - expensive access (500 USD for 5 Mbps)
 - negligible fixed broadband
- ability to pay
